CURRICULUM VITAE

MUSA-AZEEZ, Taslim Eniola

taslim.eniolla@gmail.com   0708-471-2978   https://github.com/TASLIM-ENIOLLA

A. PERSONAL PROFILE

I am a friendly and proficient full stack web developer with zeal for developing problem solving-system with several year of experience in learning modern web development skill and development stacks. I am an excellent team player with interpersonal skill. I have collaborations with other developer both home and abroad. I have developed a number of web sites and web applications that render a service or solves a problem.

Notable among these projects is TranXfer Cloud: A online based file storage where users can store files and retrieve them on a latter date. Come next is an Online Medical Diagnostics System: An online portal where patients can interact with a Bot which queries for symptoms and can predict with a high level of accuracy if the patient is infected with Covid 19 or not. Another is a surveillance system using Python's OpenCV framework. These projects earned me my expertise and proficiency which gives me an edge over a large number of developers out there.
